

SAVIOURS *of the* ENVIRONMENT

Welcome to the "Saviours of the Environment" calendar and booklet. This time we honour those whose tireless efforts have made our planet liveable for future generations. The calendar is designed to inspire **ACTION** and raise **AWARENESS** about climate change and the importance of preserving mother Earth.

Climate change, wildlife conservation, and other important issues facing our planet may seem much bigger than any of us, individual action can collectively make a tremendous difference. We have included some of the most inspiring champions from around the world. These people may have started their activities on a small scale, but their actions have since made such a strong impact that they will have a hand in preventing the destruction of nature.

Life Stories of these environmentalists teaches that change is possible on Earth with effort. Let's celebrate these champions and commit to being part of the solution.

The future of our planet is in our hands.

2025

NOTES

Pradip Burman

Dear Friends,

I am proud to introduce the "Saviours of the Environment" calendar, a project close to my heart. Throughout history, environmentalists have had a great impact on nature, also on individual lives. **Environmentalists have been the brains behind sustainable solutions**, authors of seminal literature, the change in public policies, individual behaviour, wildlife and ecosystems.

We are honouring 40 environmental champions from around the world who have contributed significantly towards environmental protection. These individuals have worked tirelessly to bring about change, paving the way for a sustainable future. One such example is **Dr. Rajendra Singh**, known as the Water Man of India, who dedicated his efforts to reviving rivers in Rajasthan.

Other notable figures include **Al Gore**, whose documentary *An Inconvenient Truth* raised global awareness about climate change and inspired action. Sir **David Attenborough** and his documentaries, including *Life on Earth (1979)*, *The Living Planet (1984)*, and *Planet Earth (2006)*, which have educated the public about environmental issues and the impacts of climate change.

Looking ahead, it's important that our **youth leads the way to chart the path and bring about the change for their own future**. By doing activities like picking up litter, and planting trees, we can all make our world a happier, healthier place to live.

Pradip Burman

Mobius Foundation

2025

Gautam Partho Roy

Dear Friends,

This year's "Saviours of the Environment" calendar gave me a chance to learn more about each of the champions which are featured. Their different personalities and the causes they are passionate about made this **project both interesting and challenging**.

As an artist, **my goal was to represent these remarkable individuals and their stories through my paintings**. It was important for me to capture not just their likenesses but also the essence of their work. I focused on getting the right balance of expression, colour, and background to reflect their passion and the messages they stand for.

I hope my artwork helps you connect with each champion and inspires you to appreciate their contributions.

Thank you for joining us in **celebrating these "Saviours of the Environment"**.

Gautam Partho Roy
